2018 Fall CS160 Midterm Presentation Specification

We are having a midterm presentation for teams to show your project requirement and design.
All CS160 students are expected to attend the entire presentation demo.

Presentation details

Prepare a 15min presentation and demo that show your project goal and design. Your team should be prepared to give a presentation on the following:

- Describe the need for you project and do sales pitching
- Explain Core Capabilities and Requirements of the Project
  - Use case diagram or more
- Architecture
- Detailed Design
- Prepare to explain your product with enough context so that the demo makes sense and is overall a compelling presentation.

On the day of the demo
- Bring a computing device on which to show your project, such as laptop, phone or tablet
- Charge up the power on your device before class.
- Prepare for bad internet. Keep in mind that sometimes wifi connectivity in the building isn't perfect, especially with many computers in the same room at once
- Make sure your demo is also able to run on a slow internet connection. You might also consider having as a backup local demo that works offline.

Attendance
Attendance is required for all group members, for the entire duration of the event.
